## Consolidated Liquidity Coverage Ratio as of 30 September 2020

In August 2018, the Central Bank of Bahrain issued it's regulations on Liquidity Risk Management (Module LM). The module mandates that banks must adequately manage their assets and liabilities to create strong short-term resilience and a sufficient ability to meet the bank's net cash outflows within 30 days

As per CBB Module LM, banks are required to meet the minimum LCR of at least 100% on a daily basis. This ratio was relaxed to 80% for 2020 due to the pressures within the banking sector following the COVID pandemic. Below is Bahrain Islamic Bank's LCR disclosure as of 30 September 2020:

## Consolidated Net Stable Funding Ratio as of 30 September 2020

In August 2018, the Central Bank of Bahrain issued it's regulations on Liquidity Risk Management (Module LM). The main objective of the NSFR is to promote the resilience of the banking system by improving the funding profile of banks by ensuring they have sufficient level of stable funding in relation to their assets and commitments. The NSFR thus promotes banks to rely on funding from stable sources and long-term borrowing in order to reduce the risks of disruptions which might impact the bank's liquidity position.

As per CBB Module LM, banks are required to meet the minimum NSFR of at least 100% on a continuous basis. This ratio was relaxed to 80% for 2020 due to the pressures within the banking sector following the COVID pandemic. Below is Bahrain Islamic Bank's NSFR disclosure as of 30 September 2020:

						BD '000

## **Consolidated Leverage Ratio as of 30 September 2020**

In June 2018, the Central Bank of Bahrain issued regulations on the financial leverage ratio as part of the CA: Capital Adequacy Module Chapter 10, which has been implemented as of 30 June 2019.

The leverage ratio calculations take into account all on balance sheet exposures, all off balance sheet exposures, and any derivative exposures after applying the applicable adjustments as per the CBB guidelines. The leverage ratio represents how well the bank's core capital covers the bank's total exposures.

CBB require banks to hold a minimum leverage ratio of at least 3%.

S. No.	Description	BD '000
1	Total Self Financed Assets	715,071
2	Total URIA Financed Assets	502,317
